IMRAN KHAN

Senior Software Test Engineer

Profile

Accomplished IT professional with 5+ years of experience in designing and implementing testing frameworks for automotive and banking projects, with proficiency in various testing methodologies, including manual, automation, accessibility, and localisation testing.

Work Experience

2026 – 2025

Senior QA Test Engineer
Royal Class Business Center LLC – Dubai, UAE

- Led QA and launched PropExcel Property Management Software, delivering a market-ready product and ensuring high quality through structured testing strategy, defect workflows, and release gates in Jira.
- Designed and implemented a Playwright and TypeScript automation framework, automating 65 percent of regression tests, streamlining testing to a single day, and integrating UI/API tests into GitHub Actions CI pipelines.
- Directed API and performance testing, creating 150 API test cases in Postman and executing load tests with Apache JMeter, identifying critical bottlenecks before production.
- Introduced AI-assisted testing using GitHub Copilot, ChatGPT, and Claude, reducing test creation time by 30 percent and enhancing test coverage across the team

2025 – 2023

Senior Software Test Engineer
Tata Consultancy Services - General Motors , Citi Bank

- Built an automation framework for critical revenue features (Shop, Home Screen, Maps for General Motors and Global Risk Review for Citigroup), reducing test creation time by 40 percent, cutting manual effort by 50 percent, achieving 70 percent coverage, and improving reliability by 20 percent.
- Led onboarding of 14 new QA team members, reducing ramp-up time by 30 percent and increasing team productivity.
- Identified and resolved 35 pre-production defects, lowering production incidents by 12 percent and ensuring timely project delivery.
- Created a traceability matrix for all use cases, improving test coverage by 30 percent and shortening delivery timelines by 15 percent.

Core Comptencies

Cross-Functional Leadership

Stakeholder Engagement

Project Management

Test Automation

API Testing

Performance Testing

Continuous Integration/Deployment (CI/CD)

Test Case Management

Defect Tracking

Quality Assurance

Agile Methodologies

Database Testing

Cross-Platform Testing

Mobile Testing

Manual Testing

- Developed an automation framework that cut test creation time by 40%, enhancing efficiency for over 5 QA professionals.
- Conducted System Integration Testing (SIT), validating end-to-end workflows and ensuring seamless interactions between different integrated applications.

Software Test Engineer

2023 - 2021

Tata Consultancy Services - General Motors

- Formulated comprehensive end-to-end test scenarios that elevated automation coverage by 30% and reduced manual regression work by 40%.
- Constructed CI/CD pipelines using Jenkins and Azure, facilitating over 100 nightly tests, which helped detect 30% more defects earlier, thereby reducing production bugs by 25%.
- Executed API testing using tools like Charles Proxy, Postman, and Insomnia, identifying 25+ critical issues, thus averting potential annual revenue losses of $30,000.
- Directed compatibility testing on 15+ Android and iOS devices via BrowserStack and Perfecto, enhancing app stability by 20%.
- Undertook Localisation testing in 5+ global regions, leading to a 10% rise in native language downloads and a 20% increase in user engagement within the first week of release.
- Addressed 10+ accessibility concerns using VoiceOver and TalkBack, adhering to accessibility standards and garnering 70% positive feedback from visually impaired users.

International Testing Certifications

- ISTQB Advanced Level Certification – Automation Test Engineer
- ISTQB Foundational Level Certification

Technical Skills

- Automation: Selenium, Appium, Cypress, Playwright
- Programming: Java, JavaScript
- CI/CD: Jenkins, Azure DevOps
- Cloud Testing: Browser Stack, Perfecto
- Cross-Platform Testing: Android, iOS, Web
- API Testing: Rest Assured, Postman, Insomnia, Charles
- Database: SQL, MySQL
- Version Control: Git, GitHub, Bitbucket
- Project Management: Jira, Azure DevOps
- Containerization: Docker
- Cloud Services: Amazon Web Services (AWS)
